

## Instructions:

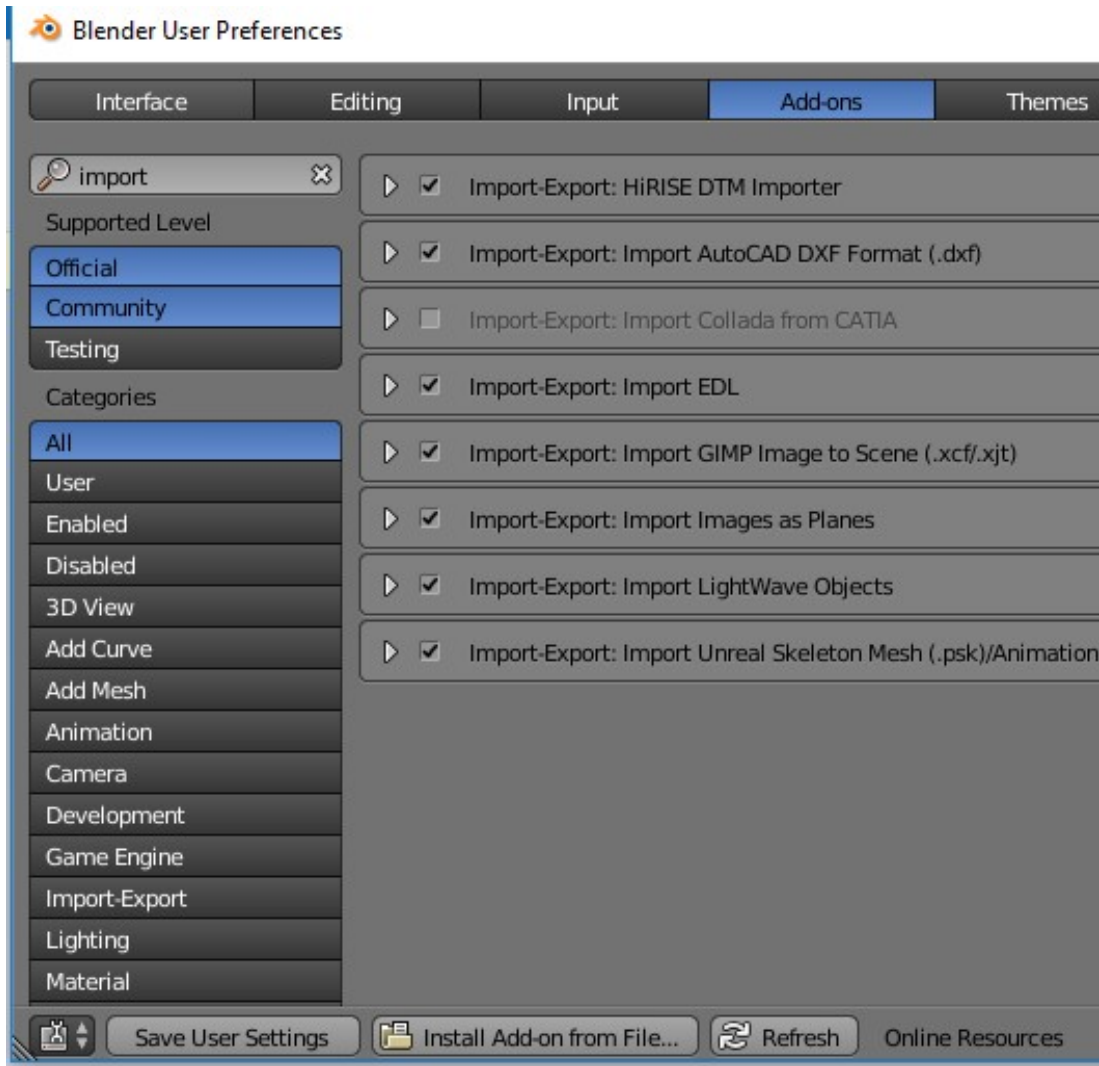

First, copy the "import\_catia\_dae.py" file in this folder somewhere in your local drive. Then, open up Blender, and go to File -> User Preferences and click on the Add-ons tab. You should see the screen below.

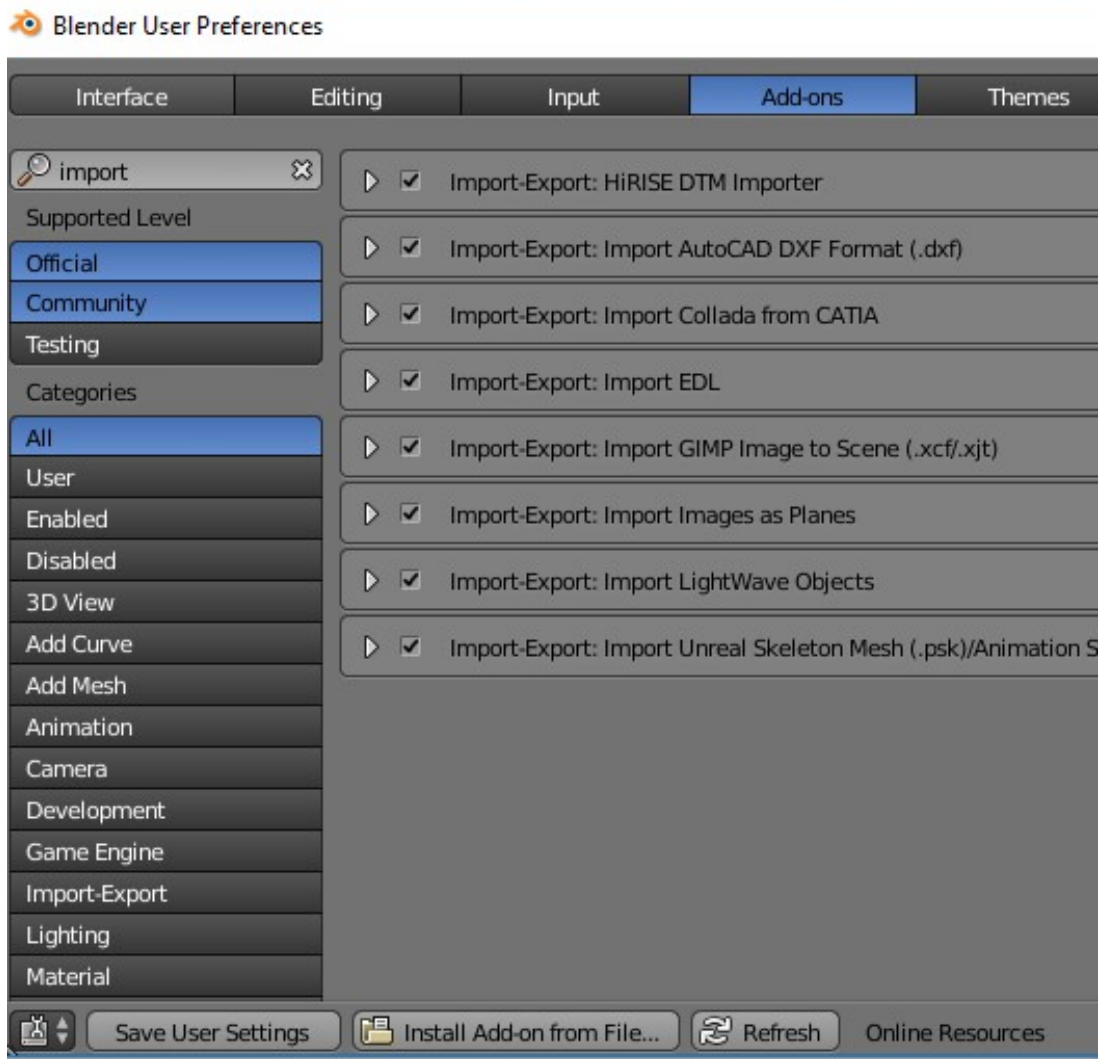

Click on Install Add-on from File ... and find the "import\_catia\_dae.py" file from your local drive and click Install Add-on from File ... on the top right like the screen below.

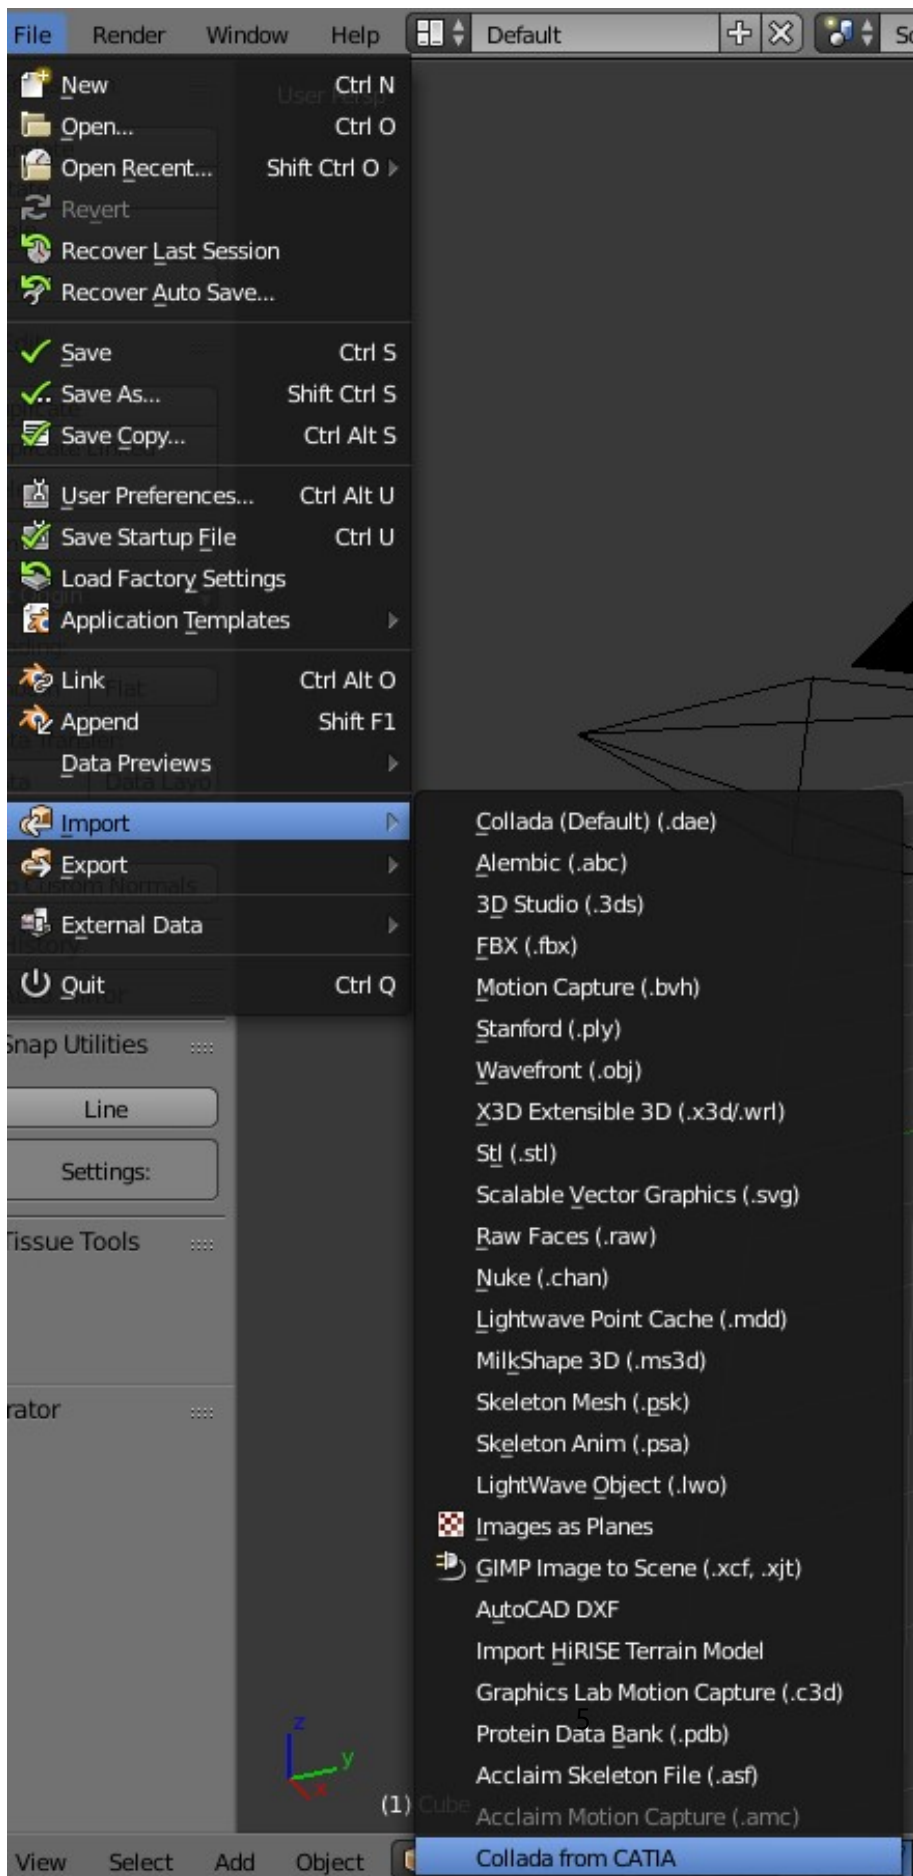

Then, type import in the search box on the Add-ons tab in File -> User Preferences like the screen below.

Then, select the checkbox on Import-Export: Import Collada from CATIA like shown below and click Save User Settings on the bottom left.

Once this is done, close the User Preferences and go to File -> Import -> Collada from CATIA like shown below.

Then, you can import the appropriate file by clicking on the file and then clicking import like shown below.
